CONTENTS

Volume 1, Issue Nos. 1–4
International Journal for
NUMERICAL METHODS IN ENGINEERING

Issue No. 1, JANUARY–MARCH

Editorial 1

T. H. H. Pian and P. Tong: Basis of Finite Element Methods for Solid Continua . . . 3

B. M. Irons: A Conforming Quartic Triangular Element for Plate Bending 29

R. D. Henshell and G. B. Warburton: Transmission of Vibration in Beam Systems . . 47

J. W. Feldmann and W. Prager: Numerical Treatment of Mixed Boundary Value Problems in Two-dimensional Elastostatics 67

O. C. Zienkiewicz, S. Valliappan and J. P. King: Elasto-plastic Solutions of Engineering Problems 'Initial Stress', Finite Element Approach 75

K. Bell: A Refined Triangular Plate Bending Finite Element 101

T. Kawai and N. Yoshimura: Analysis of Large Deflection of Plates by the Finite Element Method 123

Issue No. 2, APRIL–JUNE

R. J. Allwood and G. M. M. Cornes: A Polygonal Finite Element for Plate Bending Problems using the Assumed Stress Approach 135

H. A. Koenig and N. Davids: The Damped Transient Behaviour of Finite Beams and Plates 151

E. Cohen and H. McCallion: Improved Deformation Functions for the Finite Element Analysis of Beam Systems 163

S. Gallof and B. Kaplan: Numerical Solution and Utilization of Green's Functions . . 169

A. C. Walker: A Method of Solution for Non-linear Simultaneous Algebraic Equations . 177

E. A. Wilson: End Displacements of Semi-infinite Cylinders due to Annular Loadings . 181

B. M. Irons: Economical Computer Techniques for Numerically Integrated Finite Elements 201

J. T. Oden: A General Theory of Finite Elements
I. Topological Considerations 205

Issue No. 3, JULY–SEPTEMBER

Announcement 224

J. N. Ramsden: A Matrix Method for the Solution of Mixed Rotating and Non-rotating Vibration Systems 225

J. Tinsley Oden: A General Theory of Finite Elements
II. Applications 247

E.-M. Salonen: A Rectangular Plate Bending Element the Use of which is equivalent to the Use of the Finite Difference Method 261

B. M. Irons and R. C. Tuck: A Version of the Aitken Accelerator for Computer Iteration 275

A. G. Yevdokimov: A Theory of the Solution of Steady State Network Problems with Special Reference to Mine Ventilation Network 279

B. A. Szabo and G. C. Lee: Derivation of Stiffness Matrices for Problems in Plane Elasticity by Galerkin's Method 301

Issue No. 4, OCTOBER–DECEMBER

F. Moses and S. Onada: Minimum Weight Design of Structures with Application to Elastic Grillages 311

J. N. Ramsden and J. R. Stoker: Mass Condensation—a Semi-automatic Method for Reducing the Size of Vibration Problems 333

D. Kavlie and J. Moe: Application of Non-linear Programming to Optimum Grillage Design with Non-convex Sets of Variables 351

F. de S. Lynch: A Finite Element Method of Viscoelastic Stress Analysis with Application to Rolling Contact Problems 379

Letters to Editor

G. A. Butlin: A Note on 'A Refined Triangular Plate Bending Finite Element'
E. A. Wilson: A Note on 'End Displacements of Semi-infinite Cylinders due to Annular Loadings' 395

AUTHOR INDEX, VOLUME 1

Allwood, R. J., and Cornes, G. M. M.: A polygonal finite element for plate bending problems using the assumed stress approach, 135

Bell, K.: A refined triangular plate bending finite element, 101

Cohen, E., and McCallion, H.: Improved deformation functions for the finite element analysis of beam systems, 163
Cornes, G. M. M.: see Allwood, R. J., 135
